List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 118*		
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Lip, oral cavity, and	d pharynx	
Lip		Hydrochlorothiazide Solar radiation
Oral cavity	Alcoholic beverages Betel quid with tobacco Betel quid without tobacco Human papillomavirus type 16 Tobacco, smokeless Tobacco smoking	Human papillomavirus type 18
Salivary gland	X-radiation, gamma-radiation	Radioiodines, including lodine- 131
Tonsil	Human papillomavirus type 16	
Pharynx	Alcoholic beverages Betel quid with tobacco Human papillomavirus type 16 Tobacco smoking	Asbestos (all forms) Printing processes Tobacco smoke, secondhand
Nasopharynx	Epstein-Barr virus Formaldehyde Salted fish, Chinese-style Tobacco smoking Wood dust	
Digestive tract, upper	Acetaldehyde associated with consumption of alcoholic beverages	
Digestive organs		
Oesophagus	Acetaldehyde associated with consumption of alcoholic beverages Alcoholic beverages Betel quid with tobacco	Dry cleaning Pickled vegetables (traditional Asian) Rubber production industry
	Betel quid with tobacco Tobacco, smokeless Tobacco smoking X-radiation, gamma-radiation	Very hot beverages (squamous cell carcinoma)

		I
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Stomach	Helicobacter pylori Rubber production industry Tobacco smoking X-radiation, gamma-radiation	Asbestos (all forms) Epstein-Barr virus Lead compounds, inorganic Nitrate or nitrite (ingested) under conditions that result in endogenous nitrosation Pickled vegetables (traditional Asian) Salted fish, Chinese-style Processed meat (consumption
Colon and rectum	Alcoholic beverages Tobacco smoking X-radiation, gamma-radiation Processed meat (consumption of)	of) Asbestos (all forms) Schistosoma japonicum Red meat (consumption of)
Anus	Human immunodeficiency virus type 1 Human papillomavirus type 16	Human papillomavirus types 18, 33
Liver and bile duct	Aflatoxins Alcoholic beverages <i>Clonorchis sinensis</i> 1,2-Dichloropropane Estrogen-progestogen contraceptives Hepatitis B virus Hepatitis C virus <i>Opisthorchis viverrini</i> Plutonium Thorium-232 and its decay products Tobacco smoking (in smokers and in smokers' children) Vinyl chloride	 Androgenic (anabolic) steroids Arsenic and inorganic arsenic compounds Betel quid without tobacco DDT Dichloromethane (Methylene chloride) Human immunodeficiency virus type 1 Schistosoma japonicum Trichloroethylene X-radiation, gamma-radiation
Gall bladder	Thorium-232 and its decay products	
Pancreas	Tobacco, smokeless Tobacco smoking	Alcoholic beverages Thorium-232 and its decay products X-radiation, gamma-radiation Red meat (consumption of)

Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Digestive tract, unspecified		Radioiodines, including lodine- 131
Respiratory organs	8	
Nasal cavity and paranasal sinus	Isopropyl alcohol production Leather dust Nickel compounds Radium-226 and its decay products Radium-228 and its decay products Tobacco smoking Wood dust	Carpentry and joinery Chromium(VI) compounds Formaldehyde Textile manufacturing
Larynx	Acid mists, strong inorganic Alcoholic beverages Asbestos (all forms) Tobacco smoking	Human papillomavirus type 16 Rubber production industry Sulfur mustard Tobacco smoke, secondhand

Cancer site	Carcinogenic agents with <i>sufficient evidence</i> in humans	Agents with <i>limited evidence</i> in humans
Lung	Acheson process, occupational exposures associated withAluminum productionArsenic and inorganic arsenic compoundsAsbestos (all forms)Beryllium and beryllium compoundsBis(chloromethyl)ether; chloromethyl methyl ether (technical grade)Cadmium and cadmium compoundsChromium(VI) compoundsCoal, indoor emissions from household combustionCoal gasificationCoal-tar pitchCoke productionEngine exhaust, dieselHematite mining (underground)Iron and steel foundingMOPP (vincristine-prednisone-nitrogen mustard-procarbazine mixture)Nickel compoundsOutdoor air pollutionPaintingParticulate matter in outdoor air pollution PlutoniumRadon-222 and its decay products Rubber production industry Silica dust, crystalline SootSulfur mustard Tobacco smoke, secondhand Tobacco smoking Welding fumes X-radiation, gamma-radiation	 Acid mists, strong inorganic Art glass, glass containers and pressed ware (manufacture of) Biomass fuel (primarily wood), indoor emissions from household combustion of Bitumens, occupational exposure to oxidized bitumens and their emissions during roofing Bitumens, occupational exposure to hard bitumens and their emissions during mastic asphalt work Carbon electrode manufacture <i>alpha</i>-Chlorinated toluenes and benzoyl chloride (combined exposures) Cobalt metal with tungsten carbide Creosotes Diazinon Fibrous silicon carbide Frying, emissions from hightemperature Hydrazine Insecticides, non-arsenical, occupational exposures in spraying and application Printing processes 2,3,7,8-Tetrachlorodibenzo-para-dioxin

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 118*		
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Bone, skin, and me	sothelium, endothelium, and soft tiss	le
Bone	Plutonium Radium-224 and its decay products Radium-226 and its decay products Radium-228 and its decay products X-radiation, gamma-radiation	Radioiodines, including lodine- 131
Skin (melanoma)	Solar radiation Ultraviolet-emitting tanning devices Polychlorinated biphenyls	
Skin (other malignant neoplasms)	Arsenic and inorganic arsenic compounds Azathioprine Coal-tar distillation Coal-tar pitch Cyclosporine Methoxsalen plus ultraviolet A Mineral oils, untreated or mildly treated Shale oils Solar radiation Soot X-radiation, gamma-radiation	Creosotes Human immunodeficiency virus type 1 Human papillomavirus types 5 and 8 (in patients with <i>epidermodysplasia</i> <i>verruciformis</i>) Hydrochlorothiazide Nitrogen mustard Petroleum refining, occupational exposures Ultraviolet-emitting tanning devices Merkel cell polyomavirus (MCV)
Mesothelium (pleura and peritoneum)	Asbestos (all forms) Erionite Fluoro-edenite Painting	
Endothelium (Kaposi sarcoma)	Human immunodeficiency virus type 1 Kaposi sarcoma herpes virus	
Soft tissue		Polychlorophenols or their sodium salts (combined exposures)
		Radioiodines, including iodine- 131 2,3,7,8-Tetrachlorodibenzo- <i>para</i> -dioxin

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 118*		
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Breast and fema	ale genital organs	
Breast	Alcoholic beverages	Dieldrin
	Diethylstilbestrol	Digoxin
	Estrogen-progestogen contraceptives	Estrogen menopausal therapy
	Estrogen-progestogen menopausal	Ethylene oxide
	therapy	Polychlorinated biphenyls
	X-radiation, gamma-radiation	Shiftwork that involves circadian disruption
		Tobacco smoking
Vulva	Human papillomavirus type 16	Human immunodeficiency virus type 1
		Human papillomavirus types 18, 33
Vagina	Diethylstilbestrol (exposure in utero)	Human immunodeficiency viru
	Human papillomavirus type 16	type 1
Uterine cervix	Diethylstilbestrol (exposure in utero)	Human papillomavirus types
	Estrogen-progestogen contraceptives	26, 53, 66, 67, 68, 70, 73,
	Human immunodeficiency virus type 1	82
	Human papillomavirus types 16, 18, 31, 33, 35, 39, 45, 51, 52, 56, 58, 59	
	Tobacco smoking	
Endometrium	Estrogen menopausal therapy	Diethylstilbestrol
	Estrogen-progestogen menopausal therapy	
	Tamoxifen	
Ovary	Asbestos (all forms)	Talc-based body powder
	Estrogen menopausal therapy	(perineal use)
	Tobacco smoking	X-radiation, gamma-radiation

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 118*		
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Male genital organs	5	
Penis	Human papillomavirus type 16	Human immunodeficiency virus type 1
		Human papillomavirus type 18
Prostate		Androgenic (anabolic) steroids
		Arsenic and inorganic arsenic compounds
		Cadmium and cadmium compounds
		Malathion
		Rubber production industry
		Thorium-232 and its decay products
		X-radiation, gamma-radiation
		Red meat (consumption of)
Testis		DDT
		Diethylstilbestrol (exposure in utero)
		N,N-dimethylformamide
		Perfluorooctanoic acid

ſ

7

Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Urinary tract		
Kidney	Tobacco smoking X-radiation, gamma-radiation	Arsenic and inorganic arsenic compounds
	Trichloroethylene	Cadmium and cadmium compounds
		Perfluorooctanoic acid
		Printing processes
		Welding fumes
Renal pelvis and ureter	Aristolochic acid, plants containing Phenacetin	Aristolochic acid
	Phenacetin, analgesic mixtures containing Tobacco smoking	
Urinary bladder	Aluminum production	4-Chloro- <i>ortho</i> -toluidine
erinary bladder	4-Aminobiphenyl	Coal-tar pitch
	Arsenic and inorganic arsenic compounds	Dry cleaning
	Auramine production	Engine exhaust, diesel
	Benzidine	Hairdressers and barbers,
	Chlornaphazine	occupational exposure
	Cyclophosphamide	2-mercaptobenzothiazole
	Magenta production	Pioglitazone
	2-Naphthylamine	Printing processes
	Painting	Soot
	Rubber production industry	Textile manufacturing
	Schistosoma haematobium	Tetrachloroethylene
	Tobacco smoking	
	ortho-Toluidine	
	X-radiation, gamma-radiation	
Eye, brain, and ce	ntral nervous system	
Eye	Human immunodeficiency virus type 1	Solar radiation
	Ultraviolet-emitting tanning devices	
	Ultraviolet emissions from welding	
Brain and central nervous system	X-radiation, gamma-radiation	Radiofrequency electromagnetic fields (including from wireless phones)

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 118*		
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Endocrine glands		
Thyroid	Radioiodines, including lodine-131	
	X-radiation, gamma-radiation	

Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Lements and the meeter station and male to difference		

Lymphoid, hematopoietic, and related tissue

Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Leukaemia and/or lymphoma	Azathioprine Benzene Busulfan 1,3-Butadiene Chlorambucil Cyclophosphamide Cyclosporine Epstein-Barr virus Etoposide with cisplatin and bleomycin Fission products, including Strontium-90 Formaldehyde <i>Helicobacter pylori</i> Hepatitis C virus Human immunodeficiency virus type 1 Human T-cell lymphotropic virus type 1 Kaposi sarcoma herpes virus Lindane Melphalan MOPP (vincristine-prednisone-nitrogen mustard-procarbazine mixture) Pentachlorophenol Phosphorus-32 Rubber production industry Semustine (methyl-CCNU) Thiotepa Thorium-232 and its decay products Tobacco smoking Treosulfan X-radiation, gamma-radiation	Bischloroethyl nitrosourea (BCNU) Chloramphenicol DDT Diazinon Dichloromethane (Methylene chloride) Ethylene oxide Etoposide Glyphosate Hepatitis B virus Magnetic fields, extremely low frequency (childhood leukaemia) Malathion Mitoxantrone Nitrogen mustard Painting (childhood leukaemia from maternal exposure) Petroleum refining, occupational exposures Polychlorinated biphenyls Polychlorophenols or their sodium salts (combined exposures) Radioiodines, including lodine- 131 Radon-222 and its decay products Styrene Teniposide Trichloroethylene 2,3,7,8-Tetrachlorodibenzo- <i>para</i> -dioxin Tobacco smoking (childhood leukaemia in smokers' children) Malaria (caused by infection with <i>Plasmodium</i> <i>falciparum</i> in holoendemic areas)

Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Multiple or unspeci	fied sites	
Multiple sites (unspecified)	Cyclosporine Fission products, including strontium-90 X-radiation, gamma-radiation (exposure in utero)	Chlorophenoxy herbicides Plutonium
All cancer sites (combined)	2,3,7,8-Tetrachlorodibenzo-para-dioxin	
* This table does not include factors not covered in the IARC Monographs, notably genetic traits, reproductive status, and some nutritional factors.
